1. Restriction to one of the following inventions is required under 35 U.S.C. § 121:

I. Claims 1-8 are drawn to chimeric antiCD4 antibodies, classified in Class 530, subclass 387.3.

II. Claims 9-12 are drawn to DNA sequences and host cells containing said DNA classified in Class 435, subclass 320.1 and Class 536, subclass 23.5.

III. Claims 32-39 are drawn to a method of treatment, classified in Class 424, subclass 133.1.

2. Inventions I and III are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the product as claimed can be used in a materially different process such as an immunoassay.

3. The nucleic acids of Group II are not used in the method of Group III. Therefore they are novel and unobvious in view of each other and are patentably distinct.

4. Inventions I and II are different products. These products are structurally and functionally distinct and have different uses. Invention I is drawn to an antibody, while invention II is drawn to nucleic acids. These products are structurally different and have different uses (eg. hybridization assays using invention II, versus immunopurification or immunoassay using the claimed antibody). Therefore they are novel and unobvious in view of each other and are patentably distinct.

5. Because these inventions are distinct for the reasons given above and the search required for any group from Groups I-III are not required for any other group from Groups I-III and Groups I-III have acquired a separate status in the art as shown by their different classification and divergent subject matter, restriction for examination purposes as indicated is proper.

6. Applicant is advised that the response to this requirement to be complete must include an

election of the invention to be examined even though the requirement be traversed.

7. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 C.F.R. § 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently-filed petition under 37 C.F.R. § 1.48(b) and by the fee required under 37 C.F.R. § 1.17(h).

8. Any inquiry concerning this communication or earlier communications from the Examiner should be directed to Dr. Ron Schwadron whose telephone number is (703) 308-4680. The examiner can normally be reached Monday through Thursday from 7:30 to 6:00. A message may be left on the examiners voice mail service. If attempts to reach the examiner by telephone are unsuccessful, the Examiner's supervisor, Ms Christina Chan can be reached on (703) 308-3974. Any inquiry of a general nature or relating to the status of this application should be directed to the Group 1600 receptionist whose telephone number is (703) 308-0196.
